Methods To Get Backlinks

1. Broken link method

To find competitors websites, search this way on google

- your keyword + links
- your keywords + resources
- keywords inurl:links

Collect competitors data like (Name,email,post url,broken links,etc.)

Send mail (purpose:help)

Formate:

Hi [Name],

I was searching for some "XYZ Term" today and I came across your awesome article about "XYZ Topic."

Anyway, I couldn't help but notice that you mentioned the "XYZ website name" on the page.

As you may have heard, "XYZ website name" recently went out of business and shut down their entire site.

"Url of that website link"

You may want to remove their url from your article.

Here's a screenshot of where the link is located.

"screenshot"

Also, I recently published a "Topic Name".

"Your article link"

Might make a nice addition to the page.

Either way, keep up the awesome work!

Cheers

2. Backlinks through infographics
